(b) A multi-pronged approach has been adopted under Sarva Shiksha Abhiyan (SSA) for reducing drop-out rates. One set of interventions relates to strengthening of primary and upper primary schools and improving the quality of education through improvement in school infrastructure, recruitment of additional teachers, annual school grants, regular training of teachers, introduction of teaching practices that make classrooms more joyful and attractive, regular academic support to teacher etc. On the other hand, several interventions aim at improving the demand for schooling through community mobilization, special interventions for enrolment and retention of vulnerable groups of children including girls and children of weaker sections. Measures are also being undertaken to strengthen the accountability of the schools system towards parents and community.
